

Effective: April 2013

HEPTEEN[®] Base curing agent

Rubber Accelerator

Distribute by Double A Plus Intertrade co., ltd. www.aachemical.com

Description

HEPTEEN® Base curing agent is widely used in molded and steam cured natural rubber and pure gum compounds.

Chemical Structure

Heptaldehyde - Aniline Reaction Product

Features

- Fast curing, high temperature accelerator with a long curing range •
- Yields high modulus compounds with excellent processing safety •

Typical physical properties of HEPTEEN[®] Base curing agent

Appearance	Free flowing dark reddish-brown clear liquid
Specific Gravity	0.93

Solubility

Soluble	Insoluble
Acetone	Water
Benzene	
Ethylene dichloride	
Gasoline	
N-hexane	

Discoloration

Product discolors lightly pigmented, white or light colored compounds. Relatively nonstaining.

Food Contact Regulatory Status

177.2600: Rubber Articles Intended for Repeated Use - Limitation - 1.5% Max. For details please contact Addivant[™] Regulatory Affairs Polymer Additives.
